O VISHWANATH POOJARY

PROFILE

Experienced Java Full Stack Web Developer with a strong foundation in building dynamic and responsive web applications. Proficient in front-end technologies like HTML, CSS, JavaScript, and popular Java frameworks like Spring and Hibernate for back-end development. Skilled in creating robust server-side applications, RESTful APIs, and connecting them with sleek, user-friendly interfaces. Adept at database design and management using SQL and NoSQL databases. Strong problem-solving abilities, attention to detail, and a commitment to delivering high-quality, scalable web solutions. Experienced in version control, testing, and deployment processes. Passionate about staying up-to-date with emerging web development trends and technologies to deliver innovative solutions that meet both user and business needs.

PROFESSIONAL EXPERIENCE

WEB DEVELOPMENT

UDUPI WEB SOLUTION *∂*

08/2022 - 10/2022 UDUPI, INDIA

A web development internship will provide hands-on experience in creating dynamic and responsive websites using a comprehensive stack of technologies, including CSS, HTML, and JavaScript for front-end design and interactivity, Bootstrap for streamlined and mobile-friendly UI development, and PHP for server-side scripting and data handling. Interns will work on real-world projects, gaining practical skills in web development, debugging, and collaboration within a team, while also learning best practices and industry standards to build modern, user-friendly websites.

JAVA-FULL-STACK WEB DEVELOPMENT

KODNEST *⊗*

A Java Full Stack Web Development internship involves gaining hands-on experience in building web applications using a diverse set of technologies and tools. This comprehensive internship program covers frontend development with HTML, CSS, JavaScript, and Bootstrap for creating responsive and visually appealing user interfaces. Additionally, interns will delve into backend development with Java, using MySQL and MongoDB for database management. The internship also includes React, a popular JavaScript library for building dynamic web interfaces. Manual testing skills are emphasized to ensure the quality and reliability of web applications. Overall, this internship provides a well-rounded learning experience in full-stack web development, equipping interns with the skills needed to create robust and modern web applications.

PROJECTS

HOTEL ROOM BOOKING

08/2022 - 10/2022

INDIA

CSS,HTML,JAVASCRIPT,PHP,MYSQL

A hotel room booking system developed with CSS, HTML, JavaScript, PHP, and MySQL allows users to browse available rooms, select check-in/check-out dates, and make reservations. The HTML and CSS create an intuitive and visually appealing user interface, while JavaScript enhances user experience with dynamic features like date pickers and real-time price calculations. PHP handles server-side logic, managing user data and interacting with the MySQL database to store room availability and booking details. The system efficiently processes bookings, sending confirmation emails, and updating room availability in real-time, ensuring a seamless and user-friendly hotel booking experience.

ONLINE-FOOD-ORDER

HTML,CSS,JS,PHP

Creating an online food ordering system using CSS, HTML, JavaScript, and PHP involves building a web application where users can browse restaurant menus, select items, and place orders. CSS and HTML are used to design and structure the user interface, making it visually appealing and responsive. JavaScript adds interactivity, allowing users to add and remove items from their orders dynamically. PHP handles server-side functionality, such as processing orders, managing user accounts, and connecting to a database to store and retrieve menu items and order history. Together, these technologies create a seamless and efficient platform for customers to order food online while providing restaurants with a convenient way to manage orders and customer data.
